Serving a wide variety of industries in California:

AGRICULTURE • COMMERCIAL LANDSCAPING • PUBLIC WORKS • PLAYGROUNDS

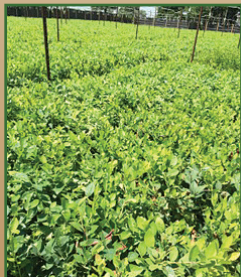

In 2017, we created the Linden Mix blend, currently used by farmers from Linden to Bakersfield for tree fruit planting, replants and blueberries!

We use 100% Fir Bark Humus, the finest base available as a planting medium.

- 50-year-old bark humus, fresh and aged 1-2 years
- Low pH 4-5, 90-95% organic matter, and has residual in the soil for over 10 years

We do propagation mixes for nurseries and custom nursery blends.

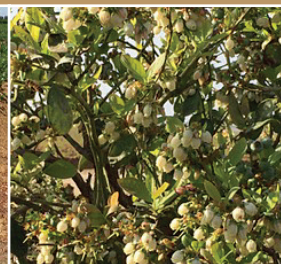

We move material from all fir bark mills in the Western U.S., depending on the size of the farm and the timing of the planting.

ORGANIC SOILS AND SOIL AMENDMENTS EXPERTS

Maximize your crop yields with custom soil blends from the ag experts at My Bark. We work with you to develop the perfect agricultural blend!
